Regional revenue table

Synthetic teaching report | Q2 and Q3 2026 | Prepared 9 November 2026

Unit: EUR thousands (not individual euros).

Region	Q2 2026	Q3 2026
North	120	150
South	80	72
East	50	0
West	-	40
Reported-value sum	250	262

Read the footnotes before comparing totals.

1. A printed 0 is a reported zero value.
2. A dash (-) means not reported. It does not mean zero.
3. The sum includes only reported values in that quarter.
4. Q2 excludes West; Q3 includes West. Coverage therefore differs.
5. Revenue is not cash collected, profit or customer count.

Definitions and permitted conclusions

Evidence notes for the regional table on page 1

Reporting coverage

North, South and East have reported values in both quarters.

West has no Q2 value in this report. Do not reconstruct or assume it.

What the Q3 chart should show

Use all four Q3 values from page 1, including the zero for East.

Keep the axis or chart title labeled EUR thousands.

Comparisons need an explicit scope

A change in the reported-value sum is not a like-for-like growth rate.

If comparing a common set of regions, name the included regions.

No record explains why East is zero or why South changed.

No cause, forecast, profit figure or cash figure is supplied.

Document status

This fixture was authored for a reproducible tutorial.

Its rasterized PDF has image-only pages; it is not a physical scan.

No handwriting, skew, camera glare or degraded print is simulated.
